

Portion Scoops

Replace a simple, but reliable, portion-measuring system using paper trays with a sustainable alternative that meets go-green initiatives **NEED**

Keep the portion-control accuracy of the old system, but lose the mess, the trash and the recurring material costs that come with it **CHALLENGE**

Develop a family of variable-sized, reusable portion scoops made of an NSF-approved, dishwasher-safe, engineered plastic **SOLUTION**

After yielding substantial material-cost savings, without sacrificing the tried-and-true benefits of the old system, the scoops went on to win an annual "product development" award **RESULT**
