

## Easy LettuceKutter™

Improve the speed and labor efficiency  
of the kitchen's salad-prep process . . . . . **NEED**

While the Easy LettuceKutter was clearly faster  
and more consistent than a manual knife, and  
held the high-integrity cut necessary to maintain  
salad quality, the chore of, then, transporting  
the lettuce into a salad-dryer spinner basket  
was still a glaring labor hiccup . . . . . **CHALLENGE**

Engineer a polyethylene cutting board with an  
opening in the middle that would support the  
Easy LettuceKutter directly on top of the  
spinner basket, allowing the lettuce to  
fall directly from the blades into the basket . . . . . **SOLUTION**

Regional on-site testing in 16 select locations  
validated the labor savings, opening the way for  
a chain-wide rollout across all 500 stores . . . . . **RESULT**
